INTRODUCTION TO SAAS & CRM

SaaS (Software as a Service)

It is a cloud computing model where software applications are provided to users over the internet. Users access the software through web browsers, eliminating the need for installation & maintenance on their local machines.

Benefits :-

- Cost Saving
- Scalability
- Accessibility
- Easy updates

Examples :-

- Google Workspace
- Microsoft 365
- Slack
- Trello
- Salesforce
- Hubspot
- Canva
- Figma

CRM (CUSTOMER RELATIONSHIP MANAGEMENT)

It is a strategic approach that business use to manage interactions and relationships with current and potential customers.

It involves utilizing technology to organize, automate & synchronize sales, marketing, customer service, and technical support.

Date __/__/__
Page _____

The primary focus of CRM is to enhance customer satisfaction and loyalty by understanding their needs and preferences better.

Role:-
- It sets bold aspirations
- It sets and executes the client relationship strategy
- It creates, manages & leads the team.

Key features:-

- Contacts :- Profiles for individuals and companies. It stores names, emails, phone numbers, socials. and a timeline of every interaction

- Deals :- The specific opportunities to sell. A "Deal" track the value of a potential sale, the expected close date, and which products the customer is interested in.

- Pipelines :- A virtual representation of sales process. Deals move through stage.
Discovery → Presentation → Negotiation → Closed/won deal

- Automation :- Rules that handle repetitive tasks
